

Job Title: Full Stack Developer

Reports To: Head of Technology

Location: St. Catharines, ON

Who We Are

Caddle is a consumer insights and mobile engagement company that connects brands with their customers. We know what people buy, how they think, and help our customers sell more stuff. Caddle is a consumer platform where people can earn money for engaging with brands.

We're growing our technology team to satisfy tremendous demand for the Caddle platform from both members (users) and clients. If you're able to be pretty independent and can remove most of your own roadblocks before they become major problems, you may have what it takes!

Duties and Responsibilities

- RESTful services / API design and development
- Work with an agile team to develop, test and maintain APIs, SDKs, and mobile apps.
- Participate and lead peer reviews of designs and related code prior to release (Pull Requests, etc)
- Refactoring and rewriting a well trafficked website and API from PHP to Node.Js and React.
- Knowledge of OWASP Top 10 and how to reduce vulnerabilities
- Ability to write High Quality Unit Tests
- Provide support to business users as required.

Minimum Qualifications and Skills

- College or University degree in Computer Science or related discipline
- 3+ years software development experience
- 1 -2 years experience with PHP.
- Strong HTML & CSS Skills.
- Experience with Node.js / JavaScript
- Some experience with Test Driven Development (Red Green Refactor, Mocha + Chai)
- Working Knowledge of AWS: Lambda, CloudWatch, S3, RDS (MySQL)
- Knowledge of agile development / scrum / lean / kanban
