

CADDLE

Job Title: Junior Full Stack Developer

Reports To: Head of Technology

Location: St. Catharines, ON

Who We Are

Caddle is a consumer insights and mobile engagement company that connects brands with their customers. We know what people buy, how they think, and help our customers sell more stuff. Caddle is a consumer platform where people can earn money for engaging with brands.

We're growing our technology team to satisfy tremendous demand for the Caddle platform from both members (users) and clients. If you're able to be pretty independent and can remove most of your own roadblocks before they become major problems, you may have what it takes!

Duties and Responsibilities

- Primary focus will be on working on our websites, mobile apps, APIs and SDKs.
- Participate in peer reviews of designs and related code prior to release (Pull Requests, etc)
- Provide support to business users as required.

Minimum Qualifications and Skills

- College or University degree in Computer Science or related discipline
- 1+ years of experience with Front End Development (Does Not Need to be Paid Experience.)
- 1+ years of experience with Node.js (JavaScript) or Python. (Does Not Need to be Paid Experience.)
- Strong HTML & CSS Skills.
