

# CADDLE

**Job Title:** Senior Full Stack Developer

**Reports To:** Head of Technology

**Location:** St. Catharines, ON

## Who We Are

Caddle is a consumer insights and mobile engagement company that connects brands with their customers. We know what people buy, how they think, and help our customers sell more stuff. Caddle is a consumer platform where people can earn money for engaging with brands.

We're growing our technology team to satisfy tremendous demand for the Caddle platform from both members (users) and clients. If you're able to be pretty independent and can remove most of your own roadblocks before they become major problems, you may have what it takes!

## Duties and Responsibilities

- Documentation of technical requirements, proposals and estimates
- Participate and lead peer reviews of designs and related code prior to release (Pull Requests, etc)
- Work with and lead an agile team to develop, test and maintain websites, APIs, SDKs, and mobile apps.
- Provide support to business users and other engineering staff as required.

## Minimum Qualifications and Skills

- College or University degree in Computer Science or related discipline
- 5+ years software development experience
- 1+ years of experience leading a team of developers.
- Expert level HTML & CSS Skills.
- Experience with JavaScript (Node.js) and other scripting languages.
- Working Knowledge of AWS or other cloud providers.
- Knowledge of agile development / scrum / lean / kanban
- Knowledge of OWASP Top 10 and how to reduce vulnerabilities
- Ability to write High Quality Unit Tests
